***Reasons for Allowance***

1. Claims 9, 11, 13, and 15-30 are allowed and renumbered to claims 1-19.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 9, 11, 13, 15 and 16, the prior art of record does not teach the "collision measure is a function of an expected, weighted mean network collision rate or an expected, weighted maximum network collision rate."

Regarding claims 17-30, the prior art of record does not teach "determining network performance based on the present allocation of frequency hopping sequences for each cell, and based on the expected collision rate between each of said number of frequency hopping sequence pairs; re-allocating the frequency hopping sequences until it is determined that network performance is optimized; and based on the allocation of frequency hopping sequences that represents optimized network performance, and based on the frequency offset allocation method, constructing one or more frequency hopping sequence allocation tables which identify a prioritized listing of allocated frequency hopping sequences for each cell."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
